

Whitney T. Harden | Web Developer

Summary of Qualifications

Whitney is a front end developer who has worked on various websites as a freelancer and professionally as a developer for two organizations. In those roles she has guided clients on making development and design decisions with consideration to UX principles and accessibility. She is currently enrolled in Eleven Fifty Academy to further increase her knowledge in Web Development. Her experience includes building features, fixing bugs, and building web applications and platforms for various clients. Her strongest skills are HTML, CSS, and JavaScript. She also has experience with React.js, Node.js, and UX/UI Design. She is a problem-solver and loves to learn and be challenged.

Front End Development:

Enjoys working with teams and individually building great interfaces using front end technologies.

Technical Problem-solver:

Detail-oriented person who goes beyond the quick and easy answer to find the best solution.

Communication and Teamwork:

Effectively communicates via chat, e-mail, face-to-face, and video-conferencing tools such as Microsoft Teams, WebEx, Slack, and other similar software.

Flexibility and Adaptability:

Accustomed to working in a constantly changing work environment where I have been successful at adapting and working under pressure.
